

28mm 3 x 2 Bridge (Short Building)

B28-SB-009

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Take the floor sections and two supports from the sprue.

Glue the floor sections to the base pieces.

Remove two side pieces from the sprue.

Glue them to the lugs on the floor pieces.

The finished bridge.

We used a wood stain and then carefully painted the circles with white paint.
