

BLOTZ

Vehicle Shelters

B10-MC-004

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue.

Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Remove the three supports and two side walls from the sprue.

Glue the side walls to the supports as shown above.

Take three of the upper pieces and starting with the central one, glue them into position.

Then glue the rest into place.
