

10mm Middle East #8

B10-ME-008

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Remove the tall front and back walls of the building plus the square roof piece from the sprue.

Glue the roof section to the walls as shown – note the position of the hatch.

Take the tall side walls.

Glue these to the building as shown.

Take the short front and back walls, plus remaining roof piece.

Glue them together as shown. Note the lug on the back wall is on the left (see picture)

Attach the low section to the higher section.

Add the end wall and then glue the building to its base.
