

BLOTZ

10mm Cargo Containers #1

B10-ST-001

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Each cargo container is formed from the pieces shown above.

Glue the top and bottom to the sides.

Then attach the two end pieces.

Finally add the two roof plates.

The completed containers.
