

BLOTZ

15mm Desert Fort – Long Wall (Barracks)

B15-ME-110

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Remove the pieces shown above from the sprue.

Glue them together as shown above.

Take the "roof", back wall and connector pieces.

Attach the sub-assembly to the "roof" then add the back wall and connector pieces.

[Optional] Glue the door behind the doorway.

Attach the front wall.

Add the base, gently slotting each lug into the associated hole.

The finished model.
