

BLOTZ

20mm Desert Fort – Long Wall (Barracks)

B20-ME-110

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Remove the pieces shown above from the sprue.

Glue them together as shown above.

Take the base and connector pieces.

Attach the sub-assembly to the base then add the connector pieces.

[Optional] Glue the door behind the doorway.

Add the walkway/roof section.

Attach the front wall.

The finished model.
