

28mm Middle Eastern Building #4 (Roof) B28-ME-004-R

Please read these instructions fully before starting construction.
PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Take these pieces from the sprue.

Glue them together to form an "H" shape as shown above.

Take the two roof sections.

Attach them to the model.
We suggest you paint your roof at this point.

Take the two wall pieces.

Glue them into position as shown.

The roof in position on kit B28-ME-004.

Painting

We sprayed our roof with a red oxide car undercoat aerosol then once dry we dry brushed it with a deep pink colour to pick out the edges of the roof tiles.
