

BLOTZ

28mm Desert Fort – Corner Tower

B28-ME-104

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Remove the pieces shown above from the sprue.

Glue them together as shown above – Note the angled supports have an arrow on them which should point upwards.

Add the connector pieces.

Add the walkway piece, moving around the model gently easing each lug into the corresponding hole.

Take the tower roof and the two thinner tower wall pieces and attach them to the model as shown above.

Add the other two tower sides.

Attach the front wall piece on each side of the tower.

The finished model.
