

BLOTZ

28mm Fort Stairs

B28-SR-003

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Remove one of the supports and all the steps from the sprue.

Glue the steps into the non-etched side of the support.

Add the other side support, gently guiding each step into the appropriate hole.

Attach the rear support piece.

Add the base.

The finished model.
