

6mm 5x5 'L-Shape' Roof

B06-MW-203

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Roof Section (B06-MW-203)

First remove the six rectangular supports from the sprue and attach one to the bottom **rear** of each wall section as in the example shown above (from the buildings middle section). Allow to dry.

Starting with wall piece 'A' run clockwise around the building adding side 'B', end 'C', side 'D', side 'E' and finally end 'F'.

Note this picture shows the model upside down to make life easier when attaching the pieces together.

Finally add the decoration above each window.
