

BLOTZ

Racing Gates

B00-RT-408

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Each gate is formed from the pieces shown above.

Glue the two connectors to the gantry.

Add a foot at each end.

The numbered signs slot into place – one on each side of the gantry.

The four completed gates.

The gates once painted.
