

**BLOTZ**

# Guild Ball Scoreboard

## B00-RTG-902

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

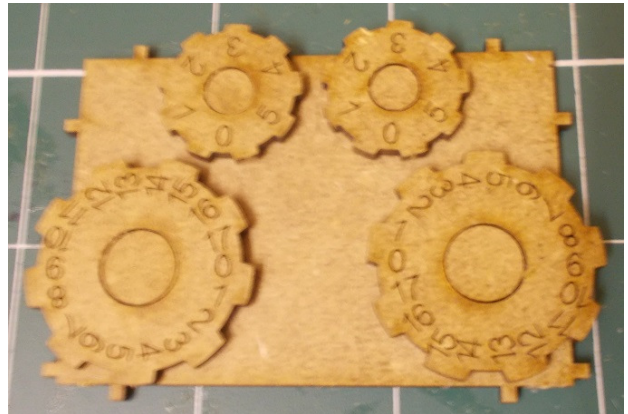

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

### Scoreboard (B00-RTG-902)

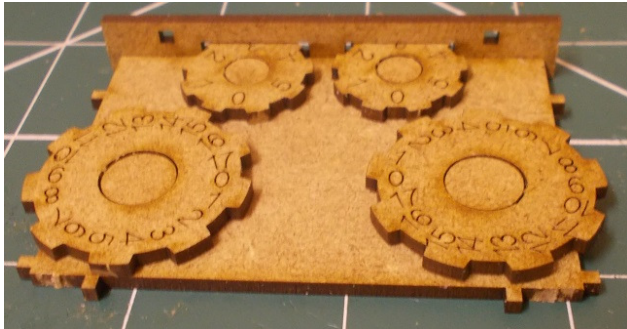

Remove the back plate and score wheels from the sprue. Carefully remove the axles from the centre of the score wheels.

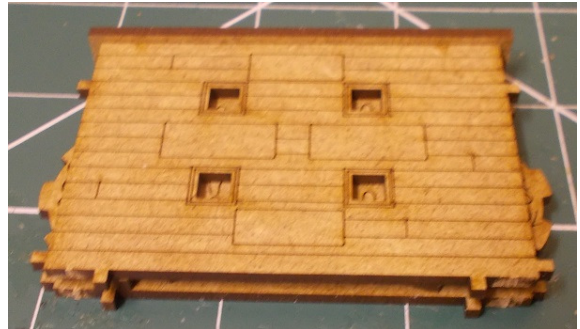

Glue the axles to the back plate using the guides scored into the plate. Leave to dry.

If you wish to spray your score wheels, do this now before they are fastened into the scoreboard.

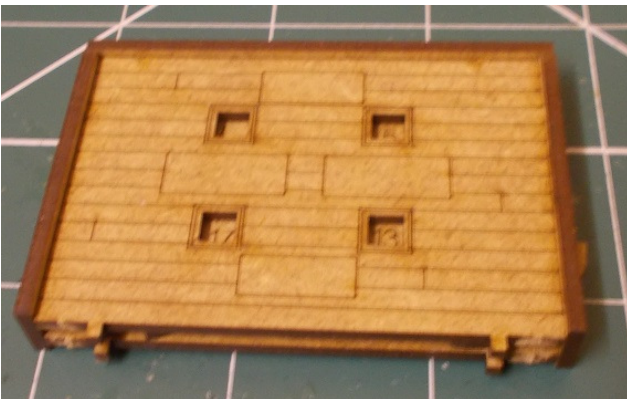

Put the score wheels over the axles. (do not glue)

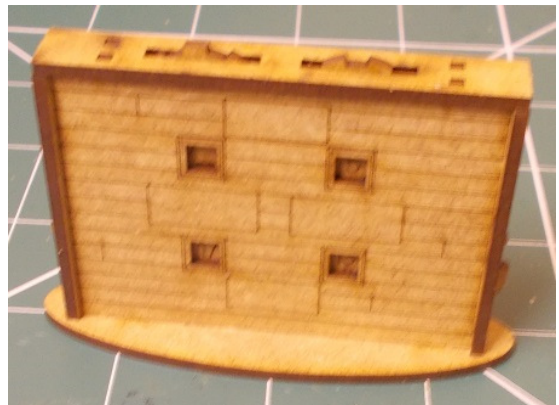

Glue the top piece into place, ensuring the score wheels fit comfortably through the holes provided.

Then glue the front plate into place.

Attach the sides – making sure the score wheels go through the slots.

Glue the scoreboard to its base.

Glue the “Home”, “Away”, “Score” and “Points” pieces into place as shown.
