

## 28mm Middle Eastern Building #3

### B28-ME-003

Please read these instructions fully before starting construction.  
PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Remove the side and front walls from the sprue.

Glue them together to form an "H" shape as shown above.

Glue this to the base.

Take the rear and arch walls...

..and glue them into position.

Take the roof supports.

Glue them into place so that they stick out through the walls (see pic)

Glue the door into position.

Place (do not glue) the roof pieces in position them glue the trapdoors to them.

Remove the archway pieces from the sprue..

Glue a set to the front and rear of the archway as shown above.

The completed building.
