

## 28mm Statue Base

**B28-ST-138**

Please read these instructions fully before starting construction.

PVA or equivalent glue will be required to stick sections together.

Sand paper can be used to gently clean any joints.

A sharp modelling knife will be required to remove sections from the sprue. Please use knives with due care and remember to cut away from yourself at all times.

During the construction of this model, you may find it convenient to use pegs / elastic bands to hold pieces in place while you allow glue to dry.

Remove the pieces shown above from the sprue.

Glue the sides to the base shown above, so that they form an open topped box.

Add the top.

Take the three remaining large pieces from the sprue.

Glue them together as shown.

Then glue them underneath the section you have already made. Add the final piece to the top (as shown).

The finished Statue base
